

DEVALIVE

Frontend Architecture Document (FAD)

Version 2.0 (Production-Ready SaaS Architecture)

FRONTEND PURPOSE

The DevAlive frontend is designed as a **complete SaaS platform**, not just a dashboard.

It delivers two core experiences:

1. **Public SaaS Marketing Experience**
2. **Authenticated Monitoring Dashboard Experience**

The frontend must be:

- Scalable
 - Modular
 - AI-buildable
 - Production-ready
 - Cleanly separated by concerns
-

COMPLETE APPLICATION STRUCTURE

DevAlive Frontend

```
├─ Public Marketing Website
|   ├── Landing Page
|   ├── Features Page
|   ├── How It Works Page
|   └── Documentation Page
|
├─ Authentication System
|   ├── Login
|   └── Register
|
└─ SaaS Dashboard Application
```

```
| | | Dashboard Overview
| | | Projects Management
| | | Analytics
| | | Monitoring Logs
| | | Notifications
| | | Settings
```

COMPLETE FOLDER STRUCTURE (PRODUCTION READY)

```

LAYOUT ARCHITECTURE

DevAlive uses **three core layouts**.

1. Marketing Layout

Used For:

Landing Page
Features Page
How It Works Page
Docs Page

Structure:

Navbar

Main Content

Footer

Purpose:

- SaaS branding
- Conversion optimization
- Product storytelling

2. Auth Layout

Used For:

Login
Register

Structure:

Centered Form
Minimal UI

Purpose:

- Clean authentication experience
- No distractions

3. Dashboard Layout

Used For:

```
Dashboard
Projects
Analytics
Logs
Notifications
Settings
```

Structure:

```
Sidebar
Topbar
Main Content Area
```

Purpose:

- Core SaaS application
- Data-heavy UI
- Productivity-focused

ROUTING ARCHITECTURE

Public Routes

```
/
/features
/how-it-works
/docs
/login
/register
```

Protected Routes

```
/dashboard  
/projects  
/projects/:projectId  
/analytics  
/logs  
/notifications  
/settings
```

LANDING PAGE ARCHITECTURE

```
Navbar

DESIGN PRINCIPLES

Frontend must feel like:

Linear

Vercel

Railway

BetterStack

Clerk

NOT like:

FRONTEND GOALS

- Clean SaaS UI
 - Dark-first design
 - Highly modular components
 - AI-friendly structure
 - Scalable architecture
 - Reusable components
 - Clear separation of concerns
-

FINAL SUMMARY

DevAlive frontend is a **full SaaS application** consisting of:

1. Marketing Website
2. Authentication System
3. Monitoring Dashboard
4. Analytics Platform
5. Documentation System

With:

- Complete folder structure
- Modular components
- Clear layouts
- Defined routing
- Production-ready architecture

This document is now structured so that **any AI or developer can build the frontend without ambiguity.**
